SUMMARY

Front-End Developer with 7+ years of experience building responsive, high-performance web applications using HTML5, CSS3, JavaScript, jQuery, Bootstrap, Tailwind CSS, React, and WordPress. Experienced in translating UI/UX designs into scalable, production-ready interfaces, optimizing cross-browser compatibility, improving website performance, and collaborating with designers, QA teams, and backend developers in Agile environments

PROFESSIONAL EXPERIENCE

NADSOFT, UI Developer 01/2019 – Present | Pune

- Developed and maintained responsive web applications using HTML5, CSS3, JavaScript, jQuery, Bootstrap, and Tailwind CSS across multiple enterprise products.
- Resolved complex UI rendering issues across Chrome, Firefox, Safari, Edge, and mobile browsers, improving consistency and reducing production defects.
- Converted Figma/PSD designs into pixel-perfect, responsive interfaces while maintaining accessibility and performance standards.
- Mentored junior developers on responsive development and frontend best practices.
- Collaborated with cross-functional teams to deliver projects on schedule.

Bitware Technologies, UI Designer 10/2017 – 01/2019 | Pune

- Designed user-friendly and visually appealing web interfaces aligned with client requirements and business objectives.
- Developed responsive layouts using HTML5, CSS3, Bootstrap, and JavaScript to ensure compatibility across desktop, tablet, and mobile devices.
- Maintained design consistency by following branding guidelines, typography, color systems, and UI best practices.

EDUCATION

Frameboxx Animation & Visual Effects, Diploma in Web Development 08/2015 – 03/2017 | Pune

SKILLS

HTML5 | CSS3 | Javascript | jQuery | Bootstrap | Tailwind CSS | SASS/SCSS | React JS |
Wordpress | Git | GitHub | Responsive Design | Mobile-First Development |
Cross-Browser Compatibility | Adobe Photoshop

PROJECTS

Netflix GPT *🔗*, Technologies: *React.js, Redux Toolkit, Firebase, Tailwind CSS*

- Developed a Netflix-inspired movie streaming application using React.js with secure Firebase Authentication.
- Integrated TMDB API to display real-time movie data, trailers, and categorized movie listings.
- Built an AI-powered movie recommendation engine using the OpenAI API for natural language-based movie discovery.
- Managed global application state using Redux Toolkit and reusable custom React Hooks.
- Designed a fully responsive UI using Tailwind CSS and deployed the application on Netlify.

Natours *🔗*, Technologies: *HTML5, CSS3, SASS, Responsive Design, CSS Animations*

- Developed a modern, fully responsive travel landing page using HTML5, CSS3, SASS, and Flexbox with a mobile-first approach.
- Implemented advanced CSS animations, responsive layouts, and interactive UI components to enhance user experience.
- Optimized the website for desktop, tablet, and mobile devices while ensuring cross-browser compatibility and clean, maintainable code.

Solo *🔗*, Technologies: *HTML5, CSS3, Bootstrap, jQuery*

- Built a responsive multi-section business website using HTML5, CSS3, Bootstrap, and jQuery.
- Integrated interactive UI components and third-party jQuery plugins to enhance navigation, user engagement, and overall usability.

Guess My Number *🔗*, Technologies: *JavaScript (ES6), HTML5, CSS3*

- Developed an interactive number guessing game using JavaScript, featuring random number generation, score tracking, high-score persistence, and real-time user feedback.
- Implemented DOM manipulation, event handling, conditional logic, and dynamic UI updates to create an engaging user experience.
- Applied core JavaScript concepts including variables, functions, comparison operators, and event listeners.

Dice Game *🔗*, Technologies: *JavaScript (ES6), HTML5, CSS3*

- Developed a browser-based multiplayer dice game with dynamic score calculation and turn-based gameplay using JavaScript.
- Implemented random number generation, DOM manipulation, event-driven interactions, conditional logic, and game state management.
